PROFILE

AI-native content producer with 10+ years in advertising agencies and 2+ years using generative AI as my primary production engine. I own the full pipeline: ComfyUI node workflows with Flux.1 and Wan2.1 for image and video, n8n for automation, and Claude Code with React and Tailwind for landing pages and web assets. At Agencia Alike I sustained content production for 10+ simultaneous accounts, delivering up to 80 assets per month at peak. I founded and exited a premium food retail business of my own while working full time as an art director, so I work with ownership over outcomes rather than deliverables. Native Spanish, professional English.
